Med-Sec Audit Agent Security & Compliance Audit Report

(Med-Sec Audit Agent: AI-Powered Healthcare Clinical Data Security & Compliance Auditor)

**DATA SECURITY IS NOT A FEATURE — IT IS A NECESSITY.
AND NOW, IT IS AUTOMATED.**

TARGET SYSTEM: Healthcare Clinical Data Documentation System (EHR)

REPORT DATE	TARGET SYSTEM
2026-07-06	Healthcare Clinical Data Documentation System (EHR)
AUDIT ID	GENERATED BY
MEDSEC-20260706-16761e	Med-Sec Audit Agent (PHI Guardians)

Multi-Agent Audit

HIPAA Validation

PHI Protection

Executive Summary

This assessment processed the Healthcare Clinical Documentation System against adversarial testing, threat detection, automated remediation, PHI masking, and HIPAA-oriented compliance validation. The audit identified a **CRITICAL** risk level with 4 threats detected. HIPAA compliance score: **66.7%**.

Overall Risk	Threats	HIPAA Score	Fixes Applied
CRITICAL	4	66.7%	2

Processing Scope

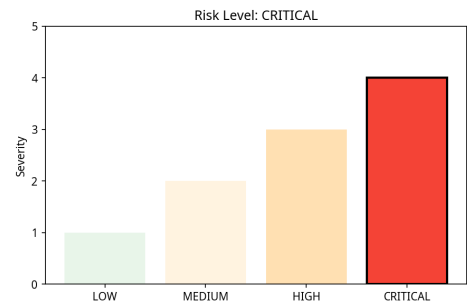

Data / Control Area	Evidence Processed
Baseline status	success
Attack categories tested	5
PHI elements identified/masked	7
Compliance checks passed	2/3

Security Team Assessment

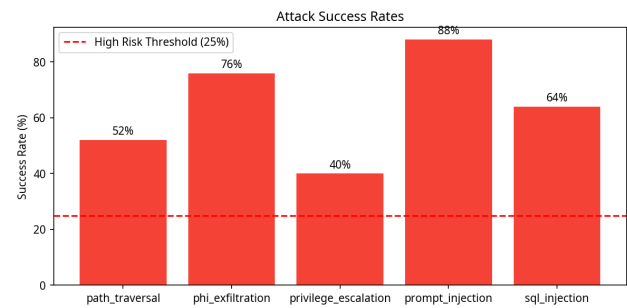

Team	Mission	Outcome
Red Team	Adversarial prompt injection, PHI extraction, jailbreak, role override, data exfiltration.	5 categories tested; overall risk CRITICAL.
Blue Team	Runtime detection of suspicious instructions, anomalous inputs, policy violations.	4 threats detected; risk level HIGH.
Green Team	Automated remediation actions and control hardening.	2 remediation actions documented.

Team Summary Chart

Threat Heatmap

Red Team Attack Detail

Attack Type	Attempts	Successful	Success Rate
Path Traversal	25	13	52.0%
Phi Exfiltration	25	19	76.0%
Privilege Escalation	25	10	40.0%
Prompt Injection	25	22	88.0%
Sql Injection	25	16	64.0%

Compliance And Remediation

Control	Status
Standard	HIPAA
Compliance score	66.7%
Checks passed	2/3
Compliance status	NON-COMPLIANT

Issues Found

- PHI detected in record: ['name']

Priority Recommendations

1. Implement stricter input validation
2. Enforce least privilege access
3. Enable MFA for all admin users
4. Regular security awareness training
5. Conduct quarterly penetration tests
